

Brafab

2023

Collection 2023.

In recent years, our outdoor environments have become increasingly important to us. What used to be just a simple patio has today become an extra living room that we enjoy as soon as the weather permits. Aspects such as comfort and aesthetics have become at least as important when we choose outdoor furniture as when we decorate indoors. At Brafab, we like that, and want to share our passion and competence regarding the opportunities to spend time outside — and on the following pages you will get an insight into Brafab's range.

We are proud of our range and this catalogue includes all our collections, but not all products. Each collection has a QR code that you scan with your phone-camera and which will then take you to brafab.com. There you will find more information about the collection and products.

Sometimes it's good to add an outside perspective

We know that at Brafab. Because what we are best at is outdoor furniture, and we know what is needed for you to spend a whole evening in comfort, how outdoor furniture should be designed in a way that lasts over time; both in form and function.

Brafab's history goes back a long way and we have a great heritage to build on. We started as a small family business back in the 1930s and today, we have grown into one of Northern Europe's largest outdoor furniture brands. However, we are still just as keen on the interplay between comfort, design and practicality, which is fundamental when we develop our range. Details, materials and the perfect proportions are what create outdoor furniture you can sit comfortably in and enjoy for a long time.

Better outlook

We must also contribute to better prospects from a wider perspective; for the environment, people and society. This means creating outdoor furniture that lasts over time, both in form and function, and our sustainability work is an important and natural part of our daily work.

Wide base with confident shape

A wide base that can be combined endlessly is the foundation of Brafab's product development. The range for 2023 is inspired by the trends that have been around for a few years; basic colours, easy-care materials and furniture that lasts over time, both in form and function. For 2023, this has been supplemented with new exciting colours and new materials. Regardless of whether you want something easy to maintain, exclusive or if you are looking for a particular style, at Brafab you will always find suitable outdoor furniture produced with great care. Our design team develops and follows the products

from idea to finished furniture so that the end result is outdoor furniture with the best comfort and durability.

Trends and inspiration

Brafab draws inspiration from the outside world and by monitoring and trying to predict upcoming trends and orientations. We believe that in the near future it will become even more important to bring hope, which we want to reflect in our outdoor furniture. Colour is a great way to bring hope so why not add more distinctive colours such as Dusty Green and Lemon to more traditional colours for outdoor furniture.
